

MANAGED DEVOPS SERVICE

IN PARTNERSHIP WITH CLOUDOPS

Speed adoption, fuel innovation and reduce operational risk – Aptum’s managed services and augmented support will allow you to own your destiny in the cloud

We help assess, implement, and operate DevOps practices like Continuous Integration/Continuous Delivery and cloud native technologies like Docker and Kubernetes.

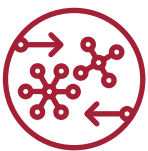

BUILDING AND RUNNING A CLOUD OPERATIONS TEAM IS CHALLENGING.

- High demand of time and costs
- Requires a culture and mindset shift to a new mode of working
- Requires new skillsets that can be hard to find
- Can carry risk and cost if not implemented correctly

Aptum offers the right expertise at the right time with 24/7 SOC 2 audited support solutions to monitor and support the day-to-day operations of your infrastructure and application platform.

We start by reviewing your application portfolio, business impact, technical risks, and the path (and gaps) to DevOps, incorporating best practices and cloud native development. We provide you with a comprehensive report on where you are and then provision a tailored DevOps environment for you that fits in with your development and delivery practices.

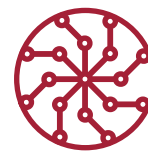

MANAGED DEVOPS

We provide a tailored DevOps platform for your business, running on highly reliable and scalable cloud infrastructure, and an experienced team, to monitor and support the day-to-day operations of your application platform 24/7.

WORKSHOPS AND ASSESSMENTS

We offer DevOps technology workshops, and a *DevOps* Platform and Practices Assessment to familiarize you with our service and to evaluate your development environment. We then make recommendations and design a tailored DevOps environment for you.

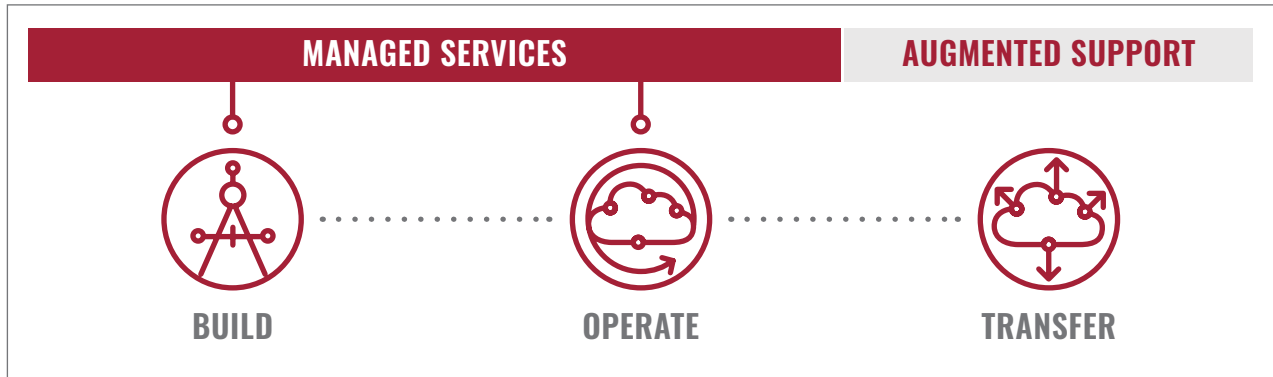

PERSONALIZED PROFESSIONAL SERVICES

Call on us at any time for detailed advice on managing, changing, or scaling your development and operations platform.

AUGMENTED SUPPORT

Have a question or a problem? Our expert advisors are available 24/7 to solve your problem and get you back to delivering world class service.

APTUM PROVIDES A SECURE AND COMPLIANT PLATFORM AND EXPERIENCED TEAM FOR:

- Monitoring and alerting
- Logging and dashboards
- Disaster recovery options
- Service desk
- Automation
- Service and business continuity

FOCUS ON INNOVATION, WE'LL SUPPORT YOUR 24/7 OPERATIONS ON ANY CLOUD

Aptum has partnered with CloudOps to provide Managed DevOps Services. CloudOps brings extensive expertise in deploying tailored Managed DevOps solutions that will allow customers to focus on developing world-class products while leaving their infrastructure management in the capable hands of Aptum and CloudOps.

CloudOps is a cloud consulting and services company focused on open source, cloud platforms, networking and DevOps. CloudOps help businesses thrive in a data driven software economy with successful adoption and operation of cloud platforms, enabling self-service, utility economics and API-automated, continuous delivery of IT.
